

## Mrs. S. F. Tolmie Died Suddenly Last Saturday

A gloom was cast over the province on Saturday afternoon last when it became known that Mrs. S. F. Tolmie, wife of the Premier of the province had passed away suddenly at her home in Saanich. While Mrs. Tolmie had not been in good health for quite some time she was not confined to her bed and on Saturday afternoon she was preparing to go for a drive when she was stricken down and passed away soon afterward.

The late Mrs. Tolmie was formerly Miss Harrop, daughter of Mr. and Mrs. J. K. Harrop of Victoria. She was born in Durham, Ont., but came to the coast with her parents in 1891, and three years later was married to S. F. Tolmie of Saanich, B. C. Members of the surviving family are her husband and two sons, Wende and Fraser of Victoria, and two daughters, Mrs. Len Andrews of Victoria and Mrs. Carl Harvey residing in the old country, and two brothers, Ralph Harrop now living in California and the other at Gordon Head, near Victoria.

Probably no wife of a premier in British Columbia was so widely known in the province as was Mrs. Tolmie. There is hardly a portion of the province she had not visited, and a couple of years ago she accompanied Premier Tolmie on the caravan trip to the north and participated in all the functions provided for the party. As a hostess she had few equals, and it was always regarded a great pleasure to be included among her guests.

There is much sympathy felt throughout the province for the Premier in his great loss as he and Mrs. Tolmie were the greatest of pals. When she was in health the Premier rarely went anywhere without her.

## STABILIZE SILVER NEXT

### Smithers Chamber of Commerce Stays With the Resolution Passed Last Fall

The Smithers District Chamber of Commerce recently passed the following resolution on the stabilization of silver, and copies have been sent to numerous persons concerned: "Resolved that this Smithers District Chamber of Commerce, representing the Bulkley Valley District of British Columbia, in annual general meeting now assembled, re-affirms its adherence to the principals expressed in the resolution passed by it in September, 1930, in favor of government action aiming at a re-establishment of the price of silver by international agreement, and ask that every possible effort be made by the governments of the province of British Columbia and of the Dominion of Canada to bring about a re-monetization and stabilization of silver by international agreement at the earliest possible date as the first step on the way to regaining prosperity throughout the world.

## SEND IN YOUR SUBSCRIPTIONS

The Board of Directors of the Hazelton Hospital decided that there be no canvass made this year for subscriptions to the hospital funds. At the same time there are always a goodly number who have not suffered from the depression to any great extent and who would like to help along the institution. Their subscriptions will be all the more welcome this year than ever. The management will be greatly pleased if those wishing to contribute will hand in or send by mail or any other way desired or convenient, their subscriptions. The need just now is even greater than at any other time.

## Annual Patrons Meeting Being Arranged For

There was a meeting of the Board of Directors of the Hazelton Hospital, held on Saturday evening, and preliminary arrangements were made for the holding of the annual meeting of the patrons of the institution. Word has been received from Rev. Geo. A. Wilson, superintendent of missions for the United Church of Canada in British Columbia, and a member of the hospital board that he would like to meet the board and also the patrons at the annual meeting. He will be coming through this district sometime in February. The board instructed the secretary to get in touch with Rev. Dr. Wilson and ascertain the date he will be here and the date of the annual meeting will be arranged accordingly, if it is at all possible. The annual report will be printed this year for distribution at the patrons meeting, and it is believed that the patrons will be pleased with the economies that have been effected during the past year. The report will show the hospital has just about broke even on the years operations, but that was done at the expense of repairs, partly, and it is hoped that the revenue this year will be sufficient to permit of at least the most urgent repairs being made, not to the hospital building but to the outbuildings, some of which are quite old and need attention. The date of the meeting will be announced later.

## NOT ONE CASE OF RELIEF

There are not many places in British Columbia where the people are not on relief of one form or another, in a more or less great extent. The Remo district has, however, lived up to the reputation established by that district as the garden of the north. There is not, and has not yet been, one case of relief. The settlers there are a hardy and an independent lot. They have some of the heaviest clearing in the north before they can start to grow anything, but they have cleared land and have planted it. They grow vegetables and small fruits, chiefly strawberries, and they grow the best in the world, bar none. The quality of their produce, and the way in which they put it up has made secure for them the Prince Rupert market, as well as a good share of the market east of here. Remo people deserve much credit for the success they have made.

## SAMPLES OF LOCAL GRANITE

For some time Ray Guss has been working on a proposition to interest manufacturers in the granite located in various parts of British Columbia, and particularly from here. He has sent out a number of samples from the local hills, and also from near Copper City, McBride and Hope and he has received much encouragement. The local granite takes a very high polish and is fitted for interior finishing. In the early spring he proposes sending out a samples weighing at least a half a ton. He also expects that the company will send men in this spring to determine the extent of the deposit as well as the shipping facilities.

Bob Wilson, who lives on J. B. Agn's island just above the Skeena river bridge says he got a shot at the black wolf that has been bothering him for some time. It was dusk when the chance came, and while he did not succeed in stopping the animal he says it left in a hurry and on three legs only. Bob has been waiting for the big fellow for the last few days—ever since it called at his cabin and cleaned out his grub canche.

## Lectures to the Poultry Raisers In the Interior

Following the very successful series of addresses on poultry problems conducted in the district last year by J. Allen, poultry inspector, provincial Department of Agriculture, arrangements are being made to have Mr. Allen come into the district again this spring. With years of experience in poultry extension work, Mr. Allen has also, for some years, been operating a poultry farm of his own. The addresses given last year were of a practical nature and the demonstrations on culling, egg grading, killing and dressing and packing were much appreciated. Now that Mr. Allen is known to many in the district an even greater interest will be taken in his addresses this year. The addresses will be held sometime towards the end of February and the first of March. Dates of meetings will be announced later. It is planned also, that between meetings Mr. Allen will call on as many farmers as possible to give them direct information on their various problems.

## OFFICERS FOR 1933 ELECTED

Smithers District Chamber of Commerce in Annual Session January 9th

The annual session of the Smithers District Chamber of Commerce was held in Smithers on January 9th last when the following officers were elected for the ensuing year:—

Hon. Pres.—Olof Hanson, M.P.  
Hon. Vice-pres.—Dr. H. C. Wrinch, M. L. A.  
President—L. S. McGill  
Vice-pres.—Frank M. Dockrill  
Secretary-treasurer—E. M. Matthew  
Council—Charles Reid, Chas. E. Morris, L. B. Warner, H. F. Noel, J. G. Stephens, H. G. Olson, John McKenzie, D. Sutherland, B. M. Hoops, N. Svenson, J. A. Rutherford, Dr. R. C. Bamford, J. P. Downey, B. F. Stewart  
Auditor—H. G. Olson.

## HAVE GONE TO VICTORIA

Chas. Killer of Telkwa and D. Sutherland of Smithers, left Thursday morning last for Vancouver, Victoria and New Westminster. They are the delegates from this part of the country to the agricultural advisory board, which each year meets with the minister of agriculture and his chiefs to discuss what is best legislation to put forward at the approaching session. The delegates told the Herald that the requests from the north will be very modest this year.

## THE END OF THE DEPRESSION

A. E. Parlow, district forester, stated to the Chamber of Commerce in Rupert that 1932 was the low ebb of the depression so far as the timber industry was concerned. Stocks at mills, in yards and in the water are the lowest for many years, if ever they were so low. He pointed out that telephone and telegraph companies must renew their pole lines shortly and railways must renew their ties. He looks for a big improvement in business in the very near future.

**The W. A. to the H. H. are holding a dance in Kitanmax Hall, Hazelton, Valentine Night, February 14th. Particulars later.**

The Omineca Herald is Two Dollars

## Kelloggs Strong For Newspaper Advertising

London, Ont.—Having proved that volume in business could be obtained throughout 1932, the Kellogg Company of Canada Limited, London, has completed plans to make 1933 another satisfactory year, according to W. K. Kellogg, founder and president of the cereal manufacturing firm.

"Early in 1932," said Mr. Kellogg, "we determined upon an aggressive merchandising and advertising effort on a nation-wide scale to keep our plants in full operation. To this end we undertook the largest advertising campaign in the company's history. As a result our plants have operated full time throughout most of the year with employment at the highest peak ever recorded."

"We are now entering 1933 with all our plans made to carry on with our merchandising and advertising activities upon the same scope and basis. Again we hope to give the retailer every possible assistance in increasing his sales of Kellogg's products. Again we hope to keep all of our people employed. We have proved that, in our line of business, the aggressive use of newspaper advertising is a most effective means of producing results—even in times like these."

"So for 1933 our plans are to continue with newspapers as the backbone of our promotional efforts. Newspapers not only give the intensive, aggressive coverage we need, but their flexibility, and splendid co-operation with our men in the field, enable us to take full advantage of every local possibility. This is a factor of great importance."

The year just ended marked the second anniversary of the adoption by Kellogg Company of Battle Creek of the six hour working shift. The change from three eight hour shifts to four six hour shifts, was made on December 1, 1930. More than 400 new permanent jobs were created. Hourly wage rates were increased to give the employees the same purchasing power as in 1928.

Mr. and Mrs. W. F. Lindsay arrived in Terrace last Wednesday night and have again become permanent residents of the town. Mr. Lindsay will shortly open up a completely new line of goods in the store he formerly conducted here. He and Mrs. Lindsay are welcomed to Terrace by a large number of their old friends.

The juvenile hockey team of New Hazelton travelled over to Hazelton last Saturday afternoon and defeated the juvenile team of the old town by a score of 9 to 1. Apparently the youngsters take their game more seriously than do the senior team who have suffered two defeats at the hands of Hazelton already.

The annual meeting of the New Hazelton church will be held on January 30th.

Mrs. Wm. Grant left on Thursday for Vancouver where she will spend the next few months with her youngest daughter, Miss Helen. Mrs. Grant has been with her daughter, Mrs. N.H. Kilpatrick at Smithers since Christmas.

Relief Agent Osborne of the C. N. R., who relieved Wm. Gow for two weeks just recently, has gone to Toronto on a holiday.

Those on relief at Kitwanga are asking the government for larger allowances and also the Hudson's Bay Co. to reduce prices in their local store.

## Dan. Williams Died in Alaska Country's Loss

Dan. Williams died on Sunday morning, January 8, at the Hirst-Chicagoff mine on Chicagoff Island, north of Baronoff Island, Alaska, where he was the manager, and had been for some time. He was fifty years of age and came originally from Montana. His first appearance in Northern British Columbia was when he came to New Hazelton in about 1913 as managing-operator at Rocher de Boule for Mr. Openheimer. For over two years Mr. Williams operated the Rocher de Boule mine and he did more actual development work and actual mining than has ever been accomplished by any other operator who has been in these parts. A very large sum of money was taken out of the property and it was one of the very few mines in the interior which gave the stockholders a run for their money. Dan. was a real operator, and he was in his glory when battling with nature and forcing her to give up the hidden treasures. He was well known in New Hazelton where he made his headquarters when not at the mine. Mr. Williams spent short periods on the Queen Charlotte Islands and he also took a whirl at the gold property at Dorreen. It never took him long to find out whether a property was at all worth while following up. He had no use for a dead one, either in a mine or in men. He was particularly alive himself and if he could not enthruse his men or make his mine produce he gave them short shift. He is survived by Mrs. Williams, formerly of Dawson and Ketchikan, and to her goes the very sincere sympathy of a host of friends in this country. She always accompanied her husband to his work and stayed on the job with him.

## TEST ALL OF YOUR SEED

Testing Done Free in Calgary Certain Months of Year—Send Samples as per Instructions Below

Due to the unfavorable season last year it is certain that the bulk of the grain harvested in the district will not be fit for seed this year. In the case of oats it is often difficult to detect frost injury and for their own information and guidance, farmers are advised to have their seed tested for purity and germination. The Dominion Seed Branch at Calgary, will test five samples of seed free for any farmer during the year, except during the rush months of February, March and April when a charge of 50c is made for each test. For grains send post-paid, a one-pound sample, timothy and alsike one ounce (7 teaspoonfuls); red clover and seeds of similar size 2 ounces (12 teaspoonfuls).

Strong vitality is the first essential of seed of any kind. Reduced yields may often be traced to the use of seed which fails to give a good stand of strong vigorous plants able to withstand unfavorable conditions.

Aside from the fact of knowing the quality of one's own seed, it is to each farmer's advantage to have it graded. Grain, before it can be offered or advertised for sale as seed, must be graded and either of No. 1, 2 or 3 quality. The special reduced freight rates for seed grain only applies when grain has been graded and certificate must be shown on request.

Though marketed conditions were unsatisfactory last year, the catch of white fish from the Dominion's fresh water fisheries was nearly 15,800,000 pounds. A large part of Canada's annual white fish landings is exported to the United States.

# The One Thing You Can Afford

The great national pastime this weather is squeezing the expenditure column so that it will remain in proportion to the revenue. The first step in this of course is making a decision as to what items are absolutely necessary to the well-being of our minds and bodies and consigning the balance to the limbo of things we will have when the times improve.

You cannot do without your local newspaper for several very good reasons, the first of which is that as an intelligent citizen of the community it is necessary that you keep informed as to what is taking place in that community what is transpiring at the school the churches; if grants are being made from public funds, or cut off; what your community proposes doing about relief measures; where food stuffs, meat, wearing apparel, wood coal, may be purchased to the best advantage; all the intimate personal news; the deaths, births, marriages, and the thousand and one other occurrences that go to make up the life of the community.

That is the function of the local weekly newspaper. Its news columns each week carry the story of the activities of the community, and in addition to the effective news of the world at large. Its advertising columns bring into your home the best offerings of the stores and shops with prices and description.

The Herald costs you but Two Dollars for a whole year. If you will read it thoroughly, intelligently you will receive many, many times over a return in value. And the Herald is a good paper for the family to read. There are many things children may learn from its columns, but nothing they should shun. The columns are clean, carefully edited and contain all the NEWS.

If you are already a subscriber to the Herald send it to a friend, either in the community or at a distance. They will appreciate it.

## Mining in British Columbia

Among the Canadian Provinces, British Columbia is the leading producer of Lead, Silver and Zinc.

In this Province about 45% of Canada's Silver, 97% of the Lead and 93% of the Zinc are produced.

British Columbia has produced approximately \$1,300,000,000 worth of minerals.

About 200,000 square miles of unexplored mineral-bearing lands are open for prospecting.

Practically every mineral known to be found on the continent occurs to some extent in British Columbia.

## Producing Early Vegetables

Production of early vegetables in gardening is always a consideration of interest and economic value. Certain phases of this work have been carried out at the Dominion Experimental station at Agassiz, success against earliness and stand of crop varying from year to year and depending to a great extent on the variation of climatic conditions such as precipitation and temperature. In essentials the production of most early crops varies but little from bringing the same crop to maturity at a later date, the chief considerations being the time and the conditions under which the seed is sown. The temperature conditions of seeding may be divided into 2 general classes, either in the open or under glass supplied with bottom heat. The advent of the electric hothead has made available for the city gardener a very satisfactory and easily handled type of hotbed in which to force the young plants. Many kinds of vegetables will respond to the planting of

seed in the open during any fine spell in late March or April. Where such procedure is followed the most satisfactory results are obtained on open soils which do not have a marked tendency to bake or become packed.

The kinds of vegetables that have proved the most satisfactory for the kind of work are cabbage, carrots, radish, lettuce, spinach, beet, peas, c. flower and turnip and early varieties of sprouted potatoes planted about the end of April. Letters addressed to the superintendent of the Experimental Farm, Agassiz will bring more detailed information.

## BEATTY FORESEES BUSINESS UPTURN

**C.P.R. President Points to Many Helpful Factors  
But Says Further Adjustment Necessary  
to Complete Re-establishment.**

"THE after-war period of adjustment through which this country is going is still short of completion," says E. W. Beatty, C.P.R., in his annual review "but I would add the positive assertion that, unhappy as the past year may have been and as lacking in re-assuring factors as the immediate future may appear, 1932 has seen definite and constructive progress towards improvement.

We see on every side the effect of long drawn-out world trade depression — a process of economic deflation — grinding slowly forward and leaving behind it a wake of human unhappiness and even ruin in directions where it seemed least likely to be possible. Having no clear vision of a definite end to our troubles, we are tempted to despair or to look for remedies to those who preach short cuts to economic security that are as unsound and as surely disastrous as were the extravagant and wasteful methods of conducting national, corporate and individual business which brought about present conditions and we are likely to overlook evidences of progress which justify the belief that this transitional period is taking its well ordered way towards better times.

A year ago I suggested that the movement towards economic readjustment would go further, perhaps even into public and governmental institutions. I am convinced that failure to boldly meet and satisfactorily deal with this matter may easily mean national insolvency and will certainly retard any possible return to a reasonably full measure of prosperity. Nothing that the troubles of the past year have brought into public recognition is so outstanding as is the need for curtailing public expenditure and co-ordinating and re-organizing public activities so that they may be placed upon a basis such as this country of ten million people can well afford. Courageous effort has accomplished real progress along this line but much remains to be done before our national affairs are on a sound economic basis. The nation's annual interest bill is mounting steadily and has done so for many years, a statement that is equally true of Dominion, provincial and municipal affairs. It is the corporate and individual taxpayer who has to pay these, and since the Canadian Pacific Railway pays yearly the country's largest tax bill I may be allowed to lay particular stress upon this point which I consider calls for earnest study at the present time.

The railway situation retains place as Canada's most imperative domestic problem. A year ago we hoped that its early solution was foreshadowed by the appointment of a competent tribunal to probe into its causes and complexities and to present an efficacious solution. We did not then foresee that the proposed solution would be based upon what the Commission thought the

people of Canada would be willing to accept rather than upon the stern necessities of the case. Nor was it then apparent that conditions that had brought about the immediate need for effective relief for a situation that threatened national bankruptcy would become still more aggravated as business offering for the railroads continued to show drastic and unprecedented declines. That is what has happened. The decrease

**Mr. E. W. Beatty  
Chairman and President  
Canadian Pacific Ry.**

in freight car loadings which began in 1930 has continued almost uninterruptedly. In 1931 up to the end of the first week of December, 558,359 less freight cars had been loaded on all Canadian Railways than for the same period of the previous year. During the same period this year 376,016 less cars were loaded than in 1931. The decline in passenger business has been relatively the same. The resultant effect upon railway earnings has been naturally disastrous. For the first ten months of 1931 Canadian Pacific gross revenue declined 22.1 per cent as compared with that of 1930. For the first ten months of this year now closing there was a further decline of 15.4 per cent. The decline continues, and there certainly appears to be no evidence in sight that for many years we shall see them entirely eliminated and our earnings back where they were in 1928. It is true that the railways have effected drastic economies. As compared with 1931 Canadian Pacific operating costs for the first ten months of 1932 were 15.3 per cent lower, and we expect that we shall make a still better showing in this regard throughout the coming year.

Having the best hope in the world, I hesitate to prophesy any great increase in gross earnings, but it is my deeply considered conviction that if the railways over the next ten or fifteen years are to live anywhere within their income, economies will have to go

very much further indeed than has yet been considered by a great number of our people who, it is only fair to state, have not had even a fair opportunity of informing themselves upon the situation. For years we have been impelled towards large capital expenditures, while at the same time competitive transportation agencies, railways, highways and canals have been built up and maintained out of public funds. Keeping these facts in view and having in mind the probable course of economic events over the next few years, the urgency of the need for fundamental change in our railway policy should be clearly apparent. I think that in the wider field of world economics we have witnessed important developments leading towards trade stabilization and encouragement. The improvements in the situation with regard to international war debts and the hope contained in the coming World Trade Conference can certainly be regarded on the brighter side of the ledger, while the first results from the Imperial Trade Conference at Ottawa in the way of improved intra-Empire trade, provide honest ground for quiet congratulation.

I am still as great an optimist as ever on the subject of Canada's ultimate future. The inherent soundness of our country strengthens me in this opinion. I do not think that our business recovery will come with a rush, since the temptation to forget the economic lessons we have learned would be too strong. For one thing, I do not hesitate to say that if within three years we found ourselves again in such a period of economic inflation as we experienced about 1928, and if we had not then definitely settled the railway problem on sound and permanent economic lines we would again be swept off our feet by the flood of competition and competitive extravagances. This, I think applies with equal force to all forms of business.

Referring a year ago to the Royal Commission on railways, I urged that the people of Canada should meet its suggested solutions for our problem with earnest consideration of their economic values unbiased by political color or preconceived prejudices. The question is now more than ever a matter of urgent public discussion and will continue so for many months. It cannot satisfactorily be dealt with in a way to save the country from disaster unless it be considered as an economic question and settled in accordance with the economic truth that transportation agencies are no different from any other form of industrial institution in that they must be both allowed and required to pay their way. Any other attempted solution of the difficulty would be ineffectual, and it is the inescapable obligation of the people of Canada to apply this test to whatever proposals for settlement of the problem may come forward.

## Terrace Notes

Mr. and Mrs. J. K. Gordon left last week for the south. After stopping at Vancouver and Seattle they will proceed to California where they will put in the winter. Mr. Gordon has not been enjoying the best of health of late and his friends hope the complete change will restore him to his old vigorous state.

## Board of Trade Elect Officers Hear Reports

The annual meeting of the Terrace and District Board of Trade was held on Tuesday night in the municipal hall. It was recommended that the executive of the associated boards of trade for Central B. C. meet as soon as possible and urge action looking to the use of available labor along the Skeena high way.

The retiring president J. K. Gordon gave a talk, pointing out the difficulties of conducting the organization during the past year, and expressing his appreciation of the work of the secretary, N. Sherwood.

The secretary gave a very complete report of the year's activities.

In nominating officers for the coming year Mr. Gordon declined to allow his name to be put up. Then Mr. Burnett was elected. H. King was elected vice president and N. Sherwood was unanimously re-elected as secretary and G. Beveridge as treasurer.

The council was formed with the following members:—W. A. Kirkpatrick, R. W. Riley, E. T. Kenney, J. Hepburn, F. Nash, George Little, T. Turner sr., J. Couture of Kalum Lake, Capt. John Willman of Usk and A. Y. Wilson of Remo.

As a token of the high esteem in which the retiring president was held by the organization, and as some measure of appreciation for the long and faithful service rendered the board by J. K. Gordon, he was elected as permanent honorary president.

The new president announced that he would arrange to have the various committees appointed ready for the next monthly meeting of the council.

A resolution was passed expressing the appreciation of the board for the loan of the municipal hall for the monthly meetings. A discussion arose on the matter of protection and feeding of the pheasants in the area, and it was decided to make a distribution of wheat to selected persons in the district, this to be used in carrying the birds over until the snow has gone.

It was also decided to recommend that the boundary between the eastern and western game districts be set at parallel 129, west of Shames, thus bringing the present anomalous situation to an end.

It was decided, owing to present conditions, not to sponsor the Burns banquet this year.

Before adjournment a vote of thanks was passed to the retiring officers and members of the council for their services during the past year.

Corp. Clark, R.C.M.P., spent a few days in the district this week.

## IN PROBATE N THE SUPREME COURT OF BRITISH COLUMBIA

N THE MATTER OF THE "ADMINISTRATION ACT" AND IN THE MATTER OF THE ESTATE OF ROBERT CORLETT, DECEASED.

Take notice that by order of His Honor F. McB. Young the 8th day of November, A.D., 1932, I was appointed executor of the estate of Robert Corlett, deceased, and all parties having claims against the said estate are hereby required to furnish same, properly verified, to me on or before the 31st day of January, A.D., 1933, and all parties indebted to the estate are required to pay the amount of their indebtedness to me forthwith.

E. T. Kenney,  
Executor,  
Terrace, B.C.

Dated the 20th day of December, A. D., 1932. 82-32

## TERRACE BEAT VANARSDOL

Fast Game Played Here on Saturday Night—Hicks Lost to Tillicums

Terrace All Stars basketball team took a victory from the combined Vanarsdol and Copper City team on Saturday night, the score being 37 to 21.

The game got away to a fast and a rough start and a number of penalties were handed out by the referee, Orval Kenney, and Billy Nelson. Percy Kennedy of Vanarsdol was put out of the game and Percy Gladstone took his place. The local group worked the ball under for nearly every shot, making points that count. Clarence MacInel and Keney Kerr as guards got the rebounds and fed the forwards with accurate passes until at half time the score stood 18 to 9. In the second half Vanarsdol put Clarke, a centre and this seemed to be a game move and they got a goodly number of counts. When the pressure got a little too strong for the local team Fred Thomas opened up and netted four tallies, with Harry Lyons following with three more, placing a safe margin to the credit of Terrace. Lloyd Johnston at left forward did some nice floor work and made a lot of openings for his team besides collecting a pair of baskets. While the score was well in favor of Terrace it was only so as a result of the boys being on their toes from start to finish, and they wound up with a healthy regard for the visitors. Following the game a dance was given and over a hundred guests were present. A return game will be played in the near future, and it is expected to be full of life.

The sharp-shooting Tillicums score, enough baskets to defeat the Hicks the preliminary game by a good margin. It was an off night for the Hicks but the girls fought hard to stem the short snappy passing attacks of the opposing forwards. The sure shots of Bessie Moore put the game on ice in the first half. Harry Lyons handled the whistle while Dunc. Kerr was at the gong.

## NEW OFFICERS INSTALLED

Lakelse Lodge, No. 33, I.O.O.F., and Mountain View Lodge No. 47, Rebekahs, held their joint installation of officers on Monday night in the lodge rooms. The new officers are:—

Lakelse Lodge—N. G., Vernon Glass; V. G., Rev. H. T. Allen; Rec. Sec., T. E. Brooks; Fin. Sec., E. Haugland; treasurer, James Smith.

Mountain View Lodge—N. G., Miss V. McInnes; V. G., Miss Betty Anderson; Rec. Sec., Mrs. T. E. Brooks; Fin. Sec., Miss M. Kirkpatrick; treasurer, Mrs. W. C. Sparkes.

## CARD OF THANKS

Mrs. W. Hippley wishes to express her sincere appreciation of the many kindnesses shown her and for the sympathy expressed in her recent bereavement, and for the floral tributes sent, out of respect for her late father.

Every one in Terrace is talking of technocracy, and the debaters who are going to discuss the subject in public shortly will need to know what they are talking about if they wish to get by the hecklers.

Mr. and Mrs. S. Wilkinson are at home again after an extended visit in Smithers and Bulkley Valley points.

A good culvert has been installed in the road around the first rock point going to the Skeena River bridge. This is a place that has been very dangerous every winter owing to the formation of quite a glacier.

## Late Charles W. Parker Was a Man of Vision and Was a Strong Character

It takes a man of vision to start a project in which the fruition can only be expected after a number of years. Such a business as growing nursery stock is usually undertaken by men who are comparatively youthful, but when a man of over 70 sets out to hew a clearing out of the forest and there undertake such work one cannot conclude but that his spirit is young in spite of his apparent years.

Such a man was Charles William Parker who was laid to rest the other day on an eminence near Terrace. Mr. Parker was nearly 80 years of age when he passed away, having been born in Truro, Cornwall, on April 3, 1844. As a youth he followed the sea, but his pioneering spirit sought a different channel of expression and he soon left the ocean for mechanical objectives. As a youth he was an expert swimmer, and during one season won a large number of prizes, and with the funds thus gathered he secured the training he desired.

He early realized that his work was to be not merely routine but of an inventive nature. When in his early 20's he moved to the United States and there for the first time struck his stride, and among his inventions was the first screw making machine to be marketed, and also one of the first harvesting machines to reduce the labor of man. He became interested in the mechanics of torpedos and introduced certain improvements, this particular phase of his work bringing him back to England, when with Messrs. Greenwood & Batley of Yorkshire, he was engaged in testing these instruments of war for some years.

His next move, this time on account of his health, was to Exeter where, seeking outdoor occupation, he dredged the waters for minute forms of life: these he mounted on microscopic slides as secured, and for some years he lectured on microscopy in that city. During this period he was connected with the curator of the Exeter museum and with many of the leading scientists of the time.

It was while he lived in Exeter that he married Elizabeth Drake, and two daughters were born by this union, one predeceasing him, and one now living in Terrace.

Eighteen ninety one saw Mr. Parker again crossing the Atlantic, this time enroute to Manitoba, then rapidly coming to the fore as the prairies opened up as the granary of the Empire. For six years he lived at Virden in that province, and in 1897 he took up land in Dauphin in the same province. He remained there until 1910 when he moved west once more to the Valley of the Skeena and located near Terrace.

Gardening and nursery work appealed to him, and carrying out a clearing in the heavy timber he proceeded to

develop strains of fruit trees, rose bushes and other shrubs particularly adapted to the climatic conditions. He became a member of the Horticultural Society of Minnesota, and with this source of information was able to keep abreast of the latest findings of his craft. He was always especially anxious to produce strains of trees suited to withstand the rigors of the climate, and in the course of his work subjected the plants to tests in excess of what they might expect when they reached his customers. His roses went through the winters unharmed. If they died he felt that he was not running the risk of purchasers being disappointed, if on the other hand they survived, he had the satisfaction of having the bushes that would succeed without pampering.

One more change came when he was 82 years of age. Not satisfied with the rate of growth on his plantation on a bench some distance above the river level, he proceeded to clear the heavy timber from a piece of land a lot closer to the water. Here, with a stump puller and other machines he made himself to save his strength he proceeded to remove the remains of the forest giants that he might have land more suited to his needs.

Three years ago he suffered a stroke and since then he has spent his time partly with his daughter, and the last nine months in the hospital at Hazelton. On January 9th he passed away quietly, after a life replete with achievements. One of the outstanding characteristics of the man was his youthfulness. Many called him "A young old man." His spirit and outlook on life defied the advancing years and his mind was ever alert for the latest advances in his work and in the affairs of the world.

The funeral of Charles William Parker was held from the Knox United Church on Wednesday afternoon, Rev. H. T. Allen conducting the services at both the church and the graveside. The pall bearers were J. K. Gordon, W. Ungerer, T. J. Kirkpatrick, O. Metz, K. Olson and J. Felber.

Reports reached town on Friday a.m. that the recent heavy rains had undermined the West hill north of town and a gang of men were sent out to make repairs.

The P. W. D. snow plow has completed clearing the road to Lakelse and is now working towards Kalum Lake.

At the two turkey shoots put on by George Little during the holidays a small amount was added to the value of each bird and the funds thus accumulated have been turned over to the Terrace Rod and Gun Club for the purchase of wheat with which to feed the local pheasants.

## Doings Around Home

Of interest to you and your friends

This has been a winter of snow thus far. Near every day there is an addition to the quantity on the ground of the beautiful, but one can get too much beautiful, not only of snow but of many other beautiful and pleasant things. A little more sunshine would meet with general approval. There is almost enough snow now to guarantee sleighing the rest of the winter.

The Hazelton Golf Club will give its annual bridge party on Wednesday evening next, January 25th at the residence of Mrs. R. S. Sargent. See the advertisement on last page for further particulars.

In the Hazelton United Church on Sunday evening next the Eleventh Anniversary of the church will be celebrated. There will be a special sermon and special music. A large congregation is requested.

The Hazelton Glee Club will give a recital in Hazelton on Friday evening, February 3rd.

The Canadian Passenger Association announces that the same low railway fares will be in effect this year as last year to all parts of the world, as well as in Canada and the United States.

Gus Christianson went up to Smithers the first of the week.

### NOTICE

#### Motor-Vehicle Act

Motorists are advised that if they wish to take advantage of the extension of time granted for the use of the 1933 license plates they must pay the full year's license fees for 1933 before March 1st, 1933. After which date a full year's license fee will still be required for all renewals but the license will be effective up to December 31st, 1933, only.

The old principal of quarterly reductions will only apply in future to purchasers of new cars.

J. H. McMullin  
Commissioner

## Omineca Assessment District

Notice is hereby given that a Court of Revision and Appeal, under the provisions of the Taxation Act and Public Schools Act in respect of the assessment rolls for the year Nineteen Thirty-three for the Omineca Assessment District, will be held in the Court House, Smithers, B. C. on Tuesday, the seventh day of February, nineteen thirty-three, at two-thirty o'clock in the afternoon.

Dated at Smithers, B. C.  
This 17th day of January, 1933

Reginald Leake Gale  
Judge of the Court of Revision and Appeal

Constable Taite of Burns Lake was sent out last week to Takla Lake to get a man who had gone insane. He left Burns Lake by airplane and upon arrival at Takla Lake found that one of the other settlers had taken charge of his man and had him ready for the constable. The return trip was made successfully and the man was given over for medical attention.

There is a serious outbreak of flu in Great Britain and several hundreds of deaths occurred in the first days.

The Dominion-Provincial Conference opened in Ottawa on Tuesday. Most important questions will be discussed such as unemployment insurance, etc. British Columbia is represented by the Minister of Finance, Hon. J. W. Jones. Premier Tolmie turned back Winnipeg where he received the news of the sudden death of Mrs. Tolmie.
